

1/2 BSP x 3/8" Angle Stop Adaptor Valve

The John Guest 1/2 BSP x 3/8" Angle Stop Adaptor Valve has been developed for the European plumbing market. The valve is connected in-line via a 1/2 BSP nut and bolt and provides an isolation for a 3/8" supply. There is a single check valve built into the 3/8" port to prevent backflow to the supply. The product is intended for use with intermittent hot and cold water.

Dimensions in mm

Parts List

Part Description	Material	Part Description	Material
Body	Acetal Copolymer (Unfilled), White	'O' Ring & Seals	Ethylene Propylene (EPDM), Black
Collet	Acetal Copolymer (Unfilled), White & Stainless Steel	3/8" Half Cartridge	Acetal Copolymer (Unfilled), White
1/2 BSP Nut & Bolt	Brass	Single Check Valve	Acetal Copolymer, Stainless Steel EPDM/Silicone or Silicone
Handled Actuating Ball	Acetal Copolymer (Unfilled), White	Retaining Rings	Acetal Copolymer (Unfilled), Light Grey
